

NUTRICIA METABOLICS AND KETOGENICS RESEARCH AWARD

This year Nutricia is offering healthcare professionals the opportunity to apply for funding of up to £15,000 to support nutrition related research into inborn errors of metabolism and medical ketogenic dietary therapy. Eligible applications for funding include clinical trials, service evaluations, surveys or audits within paediatric or adult patient groups.

A variety of research project ideas will be considered, including but not limited to:

- A questionnaire to gather patient and parent experiences of transitioning from paediatric to adult services
- An audit on the dietetic management of adults with PKU returning to a phenylalanine restricted diet, including patient outcomes such as quality of life
- A clinical trial on the efficacy of ketogenic dietary therapy in specific scenarios, such as brain injury, status epilepticus, or any other neurological condition

If you would like to apply for the Nutricia Metabolics and Ketogenics Research Award, download and complete the application form (available [here](#)) and send to scientificaffairs@nutricia.com, along with a copy of your research protocol. Further supporting information for applicants is available [here](#).

Applications open from 9am on Tuesday 19th October 2021.

The deadline for applications is 5pm on Tuesday 1st February 2022.

Successful applicants will be selected by the clinical and research experts across the Nutricia Medical team and all applicants will be notified of the outcome of their application by 5pm on Tuesday 31st May 2022. Applicants must be working in the NHS, 18 years or over, and HCPC registered healthcare professionals. Open to UK residents only (excluding Northern Ireland).
