

# Complete BAPEN's National Screening Survey this October!

**It's quick  
and easy to  
register!**

The screening survey portal is open from 1st to 31st October 2021, and can be completed via <https://data.bapen.org.uk/maw/maw-home>.

- The survey is run by one of BAPEN's standing committees, the Malnutrition Action Group (MAG). As in previous years, the survey coincides with UK Malnutrition Awareness Week and aims to take the temperature on the status of nutritional care across all health and social care settings in the UK.
- Our aim is to gather data from a range of health and social care settings across England, Wales, Scotland and Northern Ireland. By screening a large number of people across the UK, we can build a better picture of the scale of the malnutrition problem. We also want to understand the treatment that people are receiving, which will give us an estimation of the use of the various nutrition support options, including dietary options, oral nutritional supplements, tube feeding and parenteral nutrition.

**Thank you for your support – get screening!**
